

Snow Drift Covering

Create a covering of snowy splendor with our hassle-free DIY snow making technique.

Poly-Fil® Filling and snow spray is all you need to make a little or a lot.

It's snow much fun!

What's Needed:

Poly-Fil® Filling- Fairfield World

Snow Spray-1\$ Store

Hair Spray (Aqua Net)

Scrap Paper (For Spraying On)

8" Non-Stick Scissors- Fiskars

How To Make It:

Step 1

Begin by removing a few handfuls of Poly-Fil® from the bag. Arrange the Poly-Fil® around the display by stretching it out to fluff. The object is to create a covering that is airy and slightly bumpy. Continue fluffing and placing Poly-Fil® until the desired area is covered.

Step 2

Slide the scrap paper under the edges and light covered areas of the Poly-Fil®. This will protect the surface.

Begin spraying the Poly-Fil® with snow spray. Start with a light coating and build up to a med or heavy covering.

Step 3

Let the snow spray dry completely.

Spray a light coat of hair spray over the snow for additional adhesion. Remove scrap paper.

Step 4

Set the wintry scene by placing houses, trees, a train or a few woodland friends amidst the powdery mounds.

Note: The snow spray adheres well to the Poly-Fil®. Snow will fall and appear to melt away if consistency touched (as we found out after putting our display in the lobby of our apartment building). Don't fret, simply refresh your base with a second snow fall.

Poly-Fil® can also be used to create a deep powder for snowy luminaries.

Craft a luminary grouping using different shapes and sizes of glass containers. Arrange then amid a bed of fresh evergreens for an enchanting alpine glow.

What's Needed:

Poly-Fil® Stuffing- Fairfield World

Cylinder Glass Vase

Bristle Brush Tree- 1\$ Type Store

10" Battery White Lights-1\$ Type Store

Batteries- Insert in lights battery pack

Step 1 – Place Poly-Fil® in the vase. We filled ¼ of our vase.

Step 2- Form a hole in the center of the Poly-Fil®.

Step 3- Set the tree in the center of the hole. Twist the tree to adjust placement.

Step 4- Wrap and anchor the lights around the vase base once.

Step 5- Wrap the remaining lights around the vase.

Step 6- Adjust lights so battery pack is hidden at the backside of the vase

Our DIY Let It Snow Collection also includes:

- Snow Crystals
- Snow Pearls
- Snow Laden Branches
- Festive Holiday Bow
