

Belfry Bat Streamers

Create a little bat magic this Halloween with our spooky bat streamers. Quick and easy this DIY decoration can be customized to fit any space. Use indoors or outside.

What's Needed:

oly*fun® (jet black crafting material)- Fairfield World
(black cardstock or construction paper can be used for indoor bats)
Black or Grey Thread and Sewing Needle
Command Hooks® (clear for indoors) 3M
Scissors

How To Make It:

1- Download, print and cut out bat pattern.

2- Select area where the bat streamers will hang. Space size will determine how many streamers will be needed. Bats look best hung in groups. We featured 2, 3 or 4 bats per streamer.

3- Cut desired amount of bats from oly*fun®, cardstock or construction paper.

4- Thread sewing needle with black thread (single strand). Thread lengths will vary between 14" and 26" depending on space height and the amounts of bats being strung. Tie a double knot at the bottom of the thread.

Step 4

Step 5

Step 6, 7

5- String first bat on thread. Bats can be strung sitting upright, on an angle or upside down. Slide bat to the bottom and tie thread in a double knot slightly above bat's head.

6. Leaving a space, tie a third double knot. Slide on another bat, tie thread in a double knot above bat's head.

7. Knot a loop at the top of the thread to create a holder. Cut remaining thread with needle off. Continue stringing bat streamers until desired amount are made.

8. Bats can be hung from tree branches or using Command Hooks indoors.

Note:

Hang bat streamers high enough so they do not touch faces or get caught in costumes or wrap around necks.
