

## Halloween Chic

Our DIY Raven Booties are fun and fanciful. Wear alone or as part of a witch or raven costume.

### What's Needed:

Black Booties, Heels or Pumps      Hot Glue Gun w/Glue      8" Non-Stick Fiskars Scissors  
36" Black Feather Boa (1)- \$1 Item Store  
(loose black feather can also be used)

### Note:

*To keep the cost down, upcycled a pair of boots, heels, pumps or high-top sneakers. We used pair of Christian Siriano Booties from Payless that were in our closet.*

*Our total "out of pocket cost" was \$1.00 (feather boa), as we had the glue gun and scissors.*

### How To Make It:

#### Step 1

##### Zipper Footwear-

Begin gluing the feather boa to the boot edge. Place a drop of glue slightly to the left side of the zipper. Set the boas end on top. Using the scissors tip, press the boa down into the glue.

##### Non-Zipper Footwear-

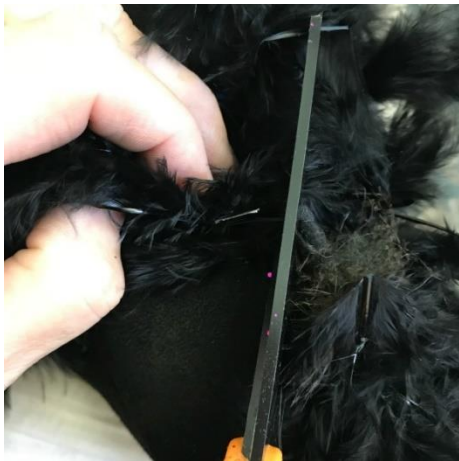

Begin at the back of the shoe. Place a drop of glue on the shoes back edge. Set a feather top. Use the scissors tip to press the feather down into the glue.

*If using loose feathers glue each on separately. Keep feathers bunched together and overlapping. This will create the look of the boa.*

### Step 2

Continuing by running a bead of glue along the boots edge. Set the boa or loose feathers on top. Press feathers into the glue using the tip of the scissors.

### Step 3

When the entire edge is covered with feathers, cut the excess boa off. Glue end down.

### Step 4

Be sure to leave the zipper area clear of feathers. If needed, trim feathers away to avoid a zipper jam.
