1-Remove Twix Minis from wrappers.

2- Place 15 to 20 candy wafers in a microwaveable bowl. Follow melting instructions on wafer package.

Note- The number of wafers to melt will depend on the amount of Twix being dipped.

3- Stir melted wafers to smooth out. If mixture is hot, let cool a few minutes so chocolate won't melt while being dipped.

4- Hold Twix mini so bottom is exposed. The object is to just cover the bottom and slightly over the edge.

5- Dip Twix in melted green wafers. If using a small amount of melted wafers Twix can sit in the melted mix.

6- Pick the Twix mini up carefully, hold in place to allow excess melt to drip off.

7- Place dipped bottom in a container of nonpareils. Let rest a few seconds. Pick Twix mini up and place on a piece of parchment paper.

8- Continue dipping Twix minis. Let set till melt hardens, about 10 to 15 minutes.

9- Using white decorating icing and the #16 tip, pipe a single white star in the center of each Twix mini.

10- Icing will become firm but can be smashed down if crushed. Store till needed.

4a- Dip in melted green wafers. If using a small amount of melted wafers Milky Way can sit in the melted. mix.

5a- Lift the Milky Way out of the melt. Turn top side up so melt creates a soft peek design on top.

6a- Place dipped Milky Ways on a piece of parchment paper.

7a- Sprinkle green Jimmies lightly on top of the green melt to create a grassy nest .

8a- Dip the bottom of a blue bird candy piece into the green melt.

9a- Place bird in the center of the Milky Way. Hold in place a few seconds so melt can set.
